Help Desk ticket 2

1. 

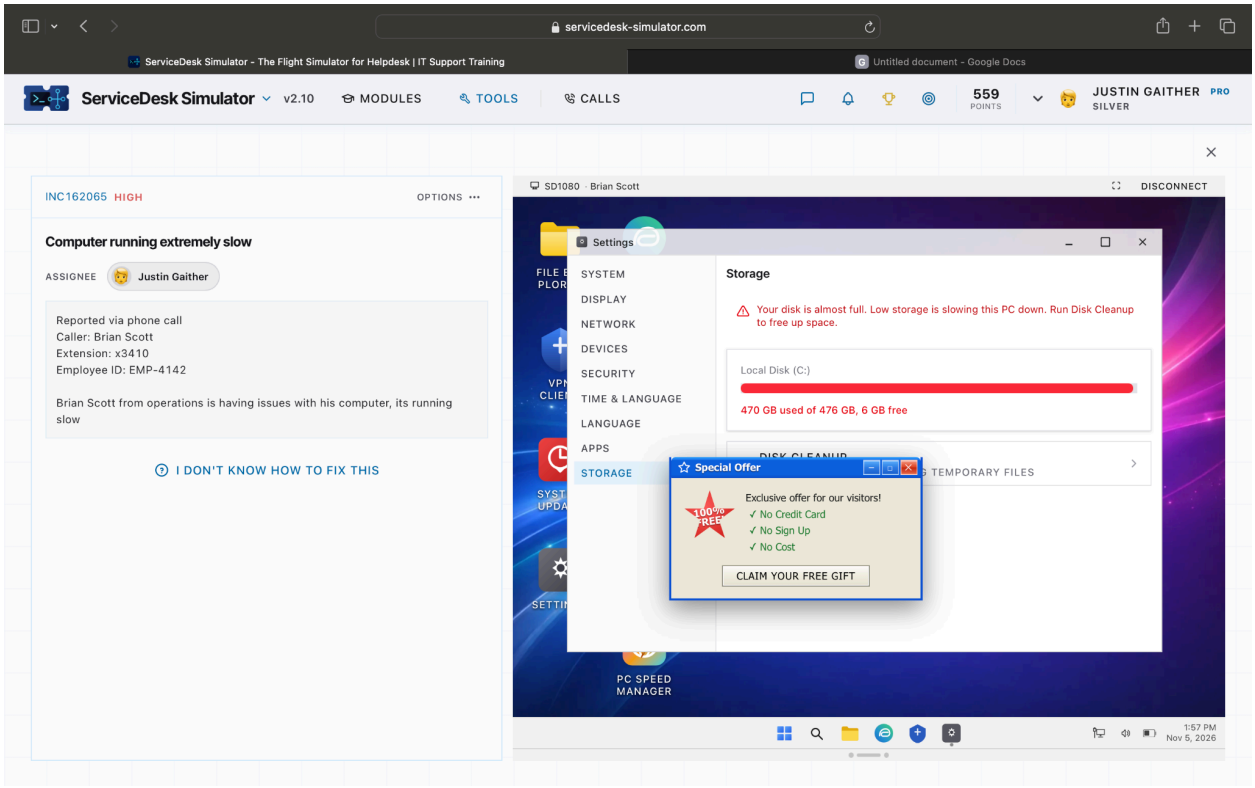

Brian Scott, an employee in the Operations department, reported that his computer is running slowly. The first step is to remotely connect to his device to investigate the issue and identify the cause of the performance problem.

Help Desk ticket 2

2. 

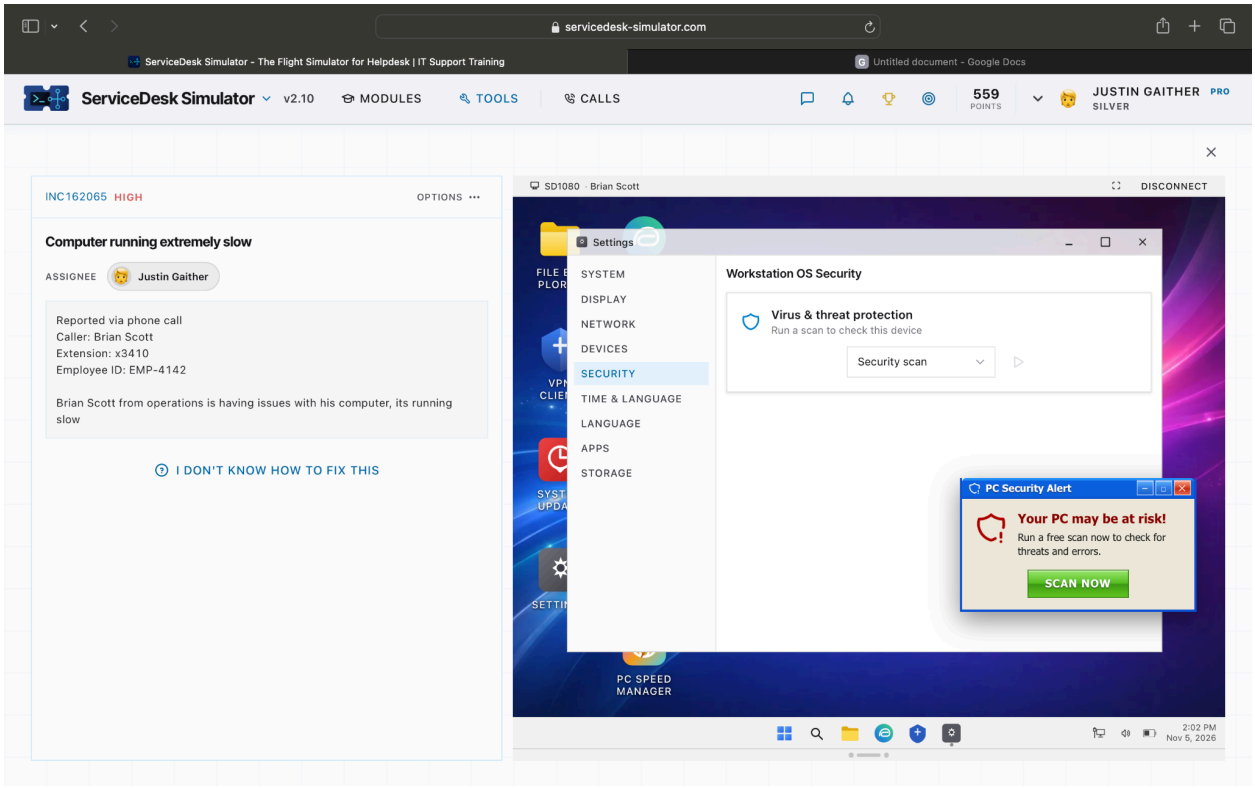

So it appears that Bryan has a virus on his computer so we're gonna update the system as the next step.

Help Desk ticket 2

3. 

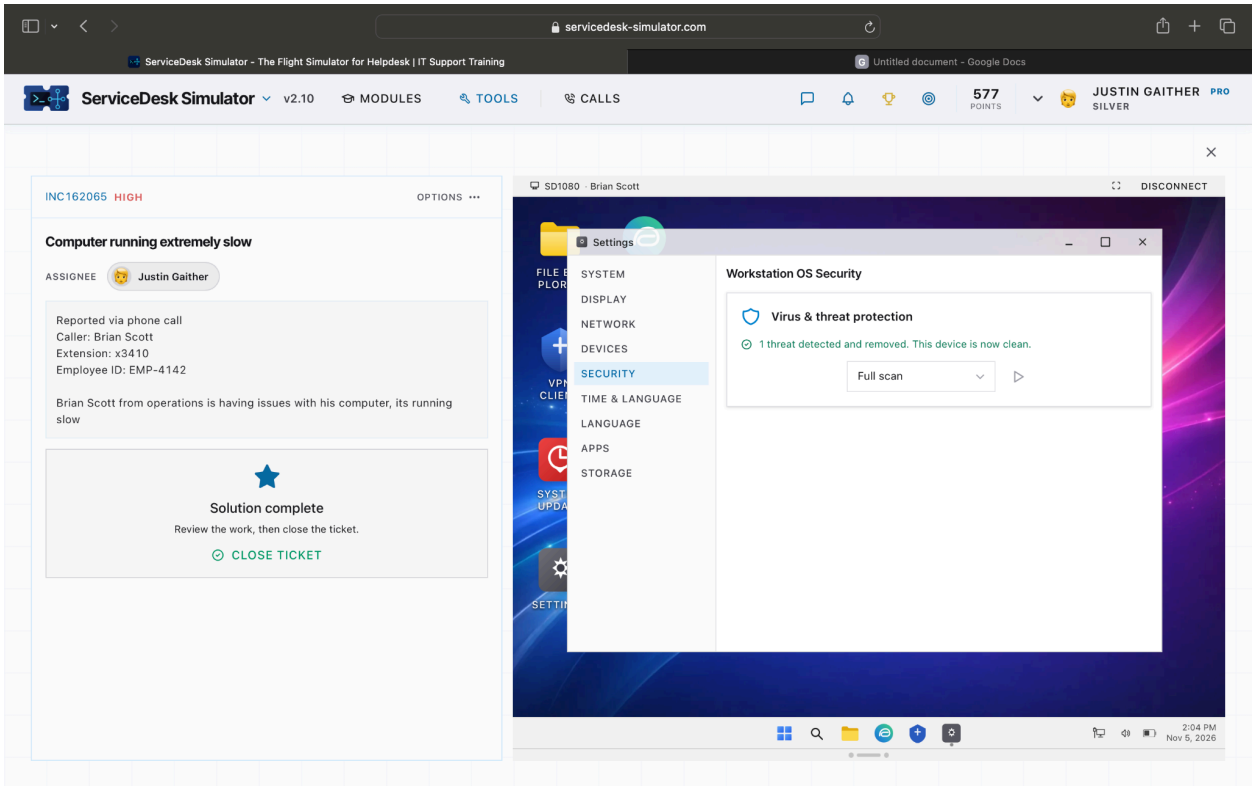

It appears that Bryan's computer is running low on available disk space. Our next step is to perform a disk cleanup to remove unnecessary files and free up storage space to see if this resolves the performance issue.

Help Desk ticket 2

4. 

In the next step where gonna do a virus and threat protection scan too see if that fixes anything.

Help Desk ticket 2

5. 

After completing all these steps, Brian computer is now fixed.
