Help Desk ticket 3

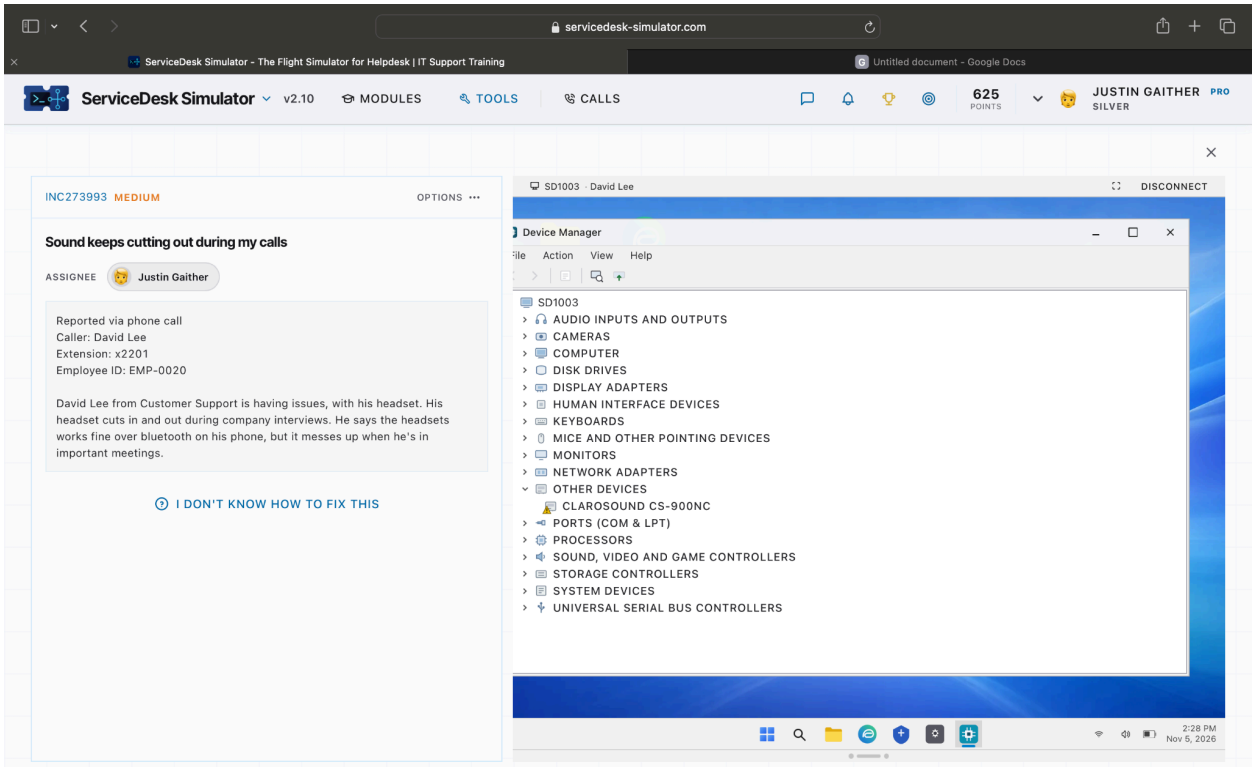

1. 

David Lee from the Customer Support department is experiencing issues with his headset. The audio keeps cutting in and out during interviews and important meetings. He mentioned that the headset works properly when connected to his phone via Bluetooth, but he continues to experience connectivity issues when using it for work.

2. 

In this next step, we'll remotely connect to his device to troubleshoot and identify any ongoing issues that may be affecting its performance.

3. 

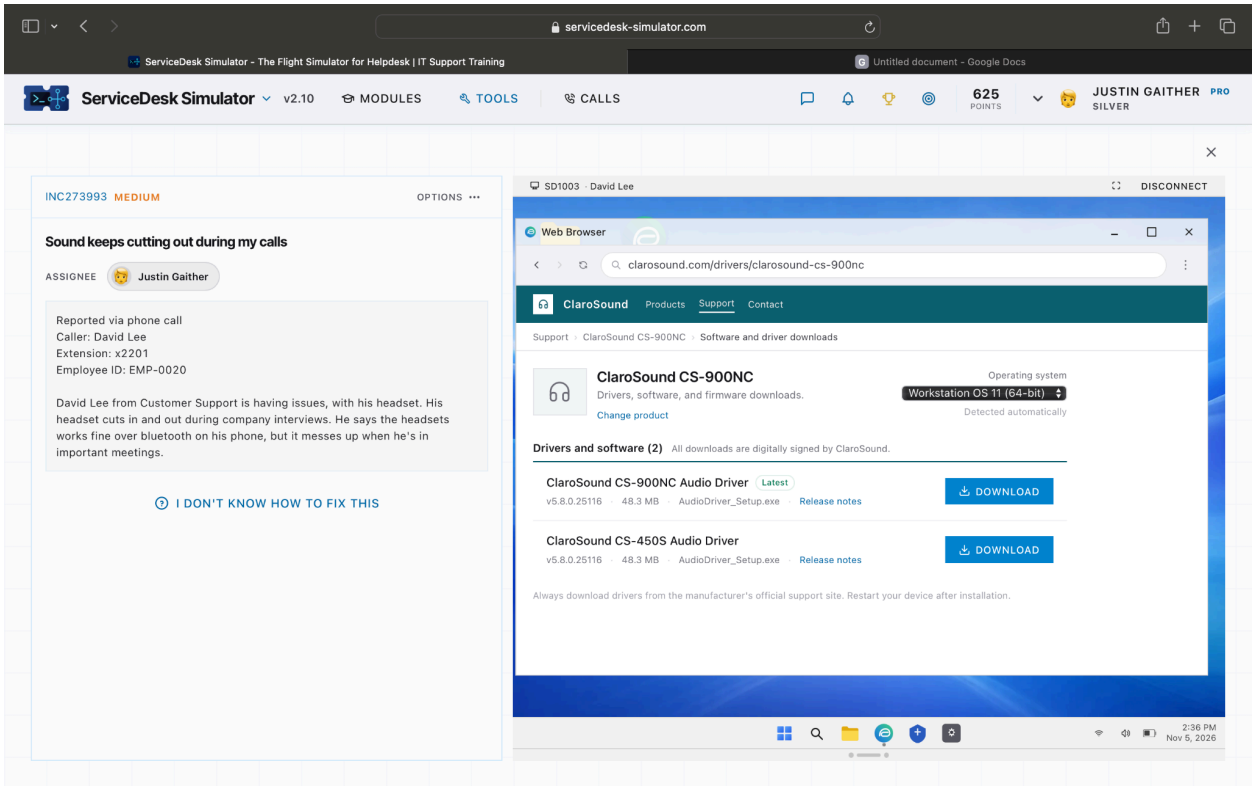

Help Desk ticket 3

In this next step we went to the device manager, to see the name of his device to apply any potential updates to the headset.

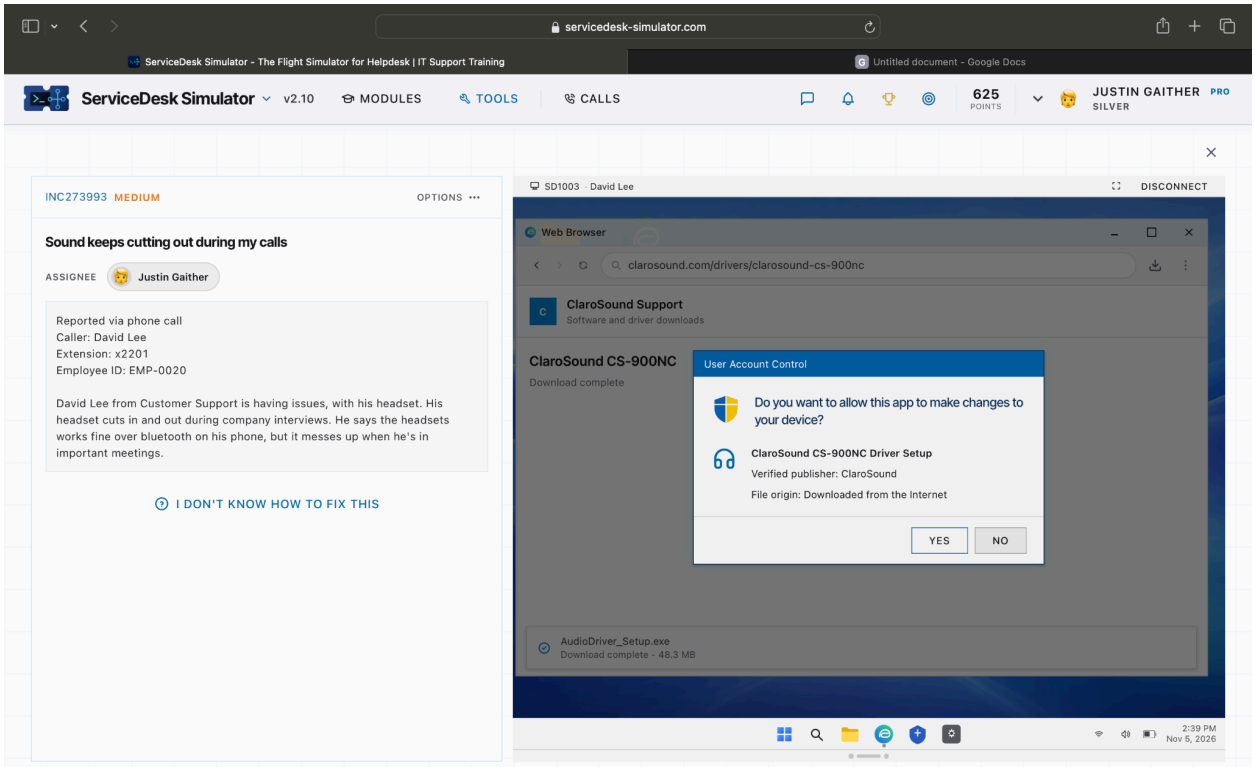

4. 

In the next step, I searched for the headset model and checked whether any software updates were available.

Help Desk ticket 3

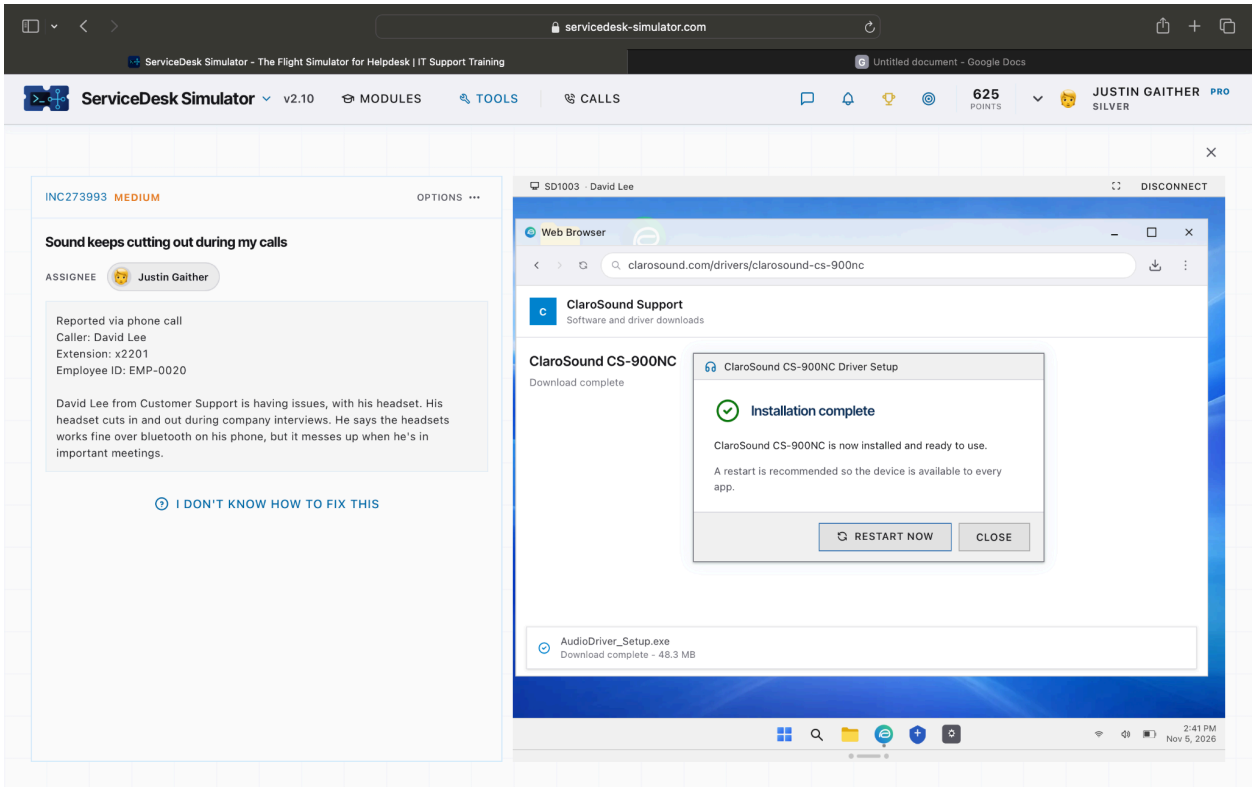

5. 

There was an update available so I went ahead and downloaded the file.

6. 

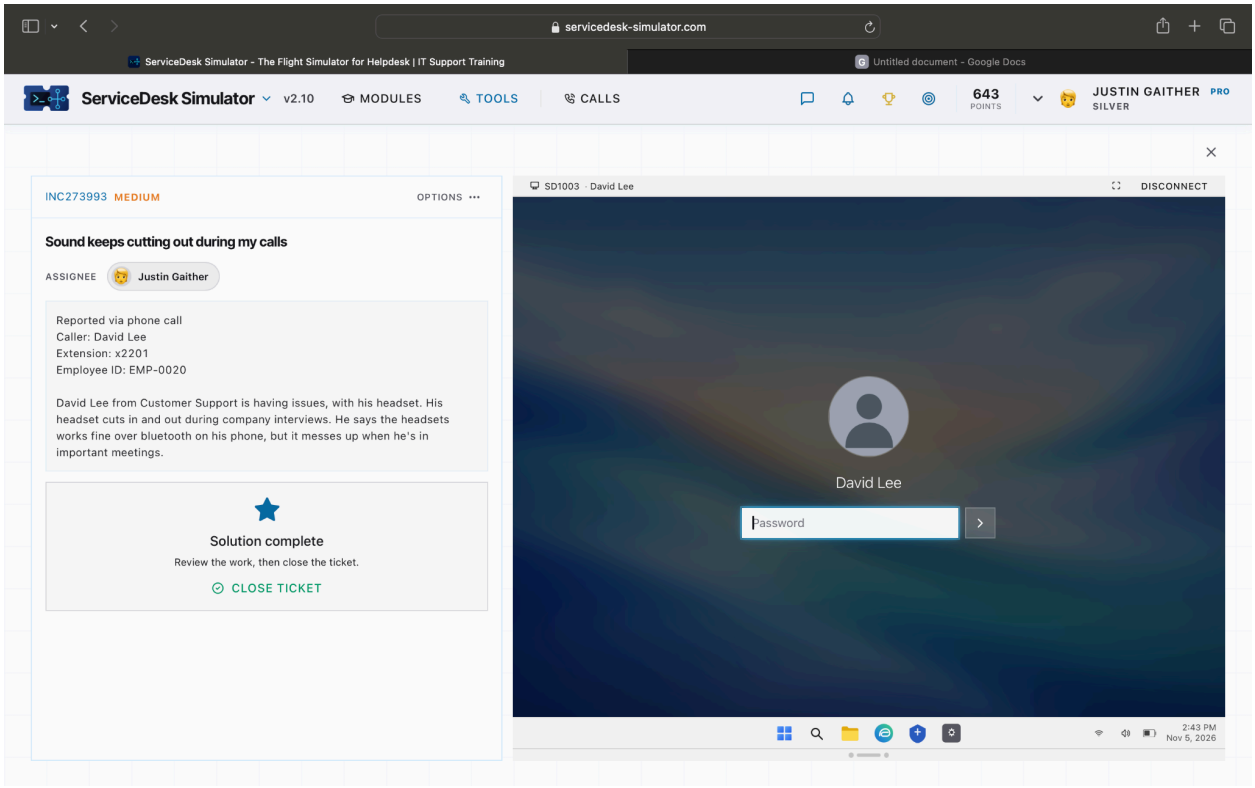

Help Desk ticket 3

In this next step, I was prompted to open the file to proceed, and I selected Yes to continue.

7. 

The headset update installation is complete. We'll now restart the computer to apply the changes.

Help Desk ticket 3

8. 

The ticket is now resolved, and David can now use his headset properly
